**Basic Socio-Economic Indicators**

**Population and Geography**
- **Area:** 77,227 km²
- **Population:** 10,525 million inhabitants (2014), an increase of 0.02% per year (2010-14)
- **Density:** 136 inhabitants/km²
- **Urban Population:** 73% of national population
- **Capital City:** Prague (12.1% of national population)

**Economic Data**
- **GDP:** 328.2 billion (current PPP international dollars)
  - i.e. 31,187 dollars per inhabitant (2014)
- **Real GDP Growth:** 2.0% (2014 vs 2013)
- **Unemployment Rate:** 6.1% (2014)
- **Foreign Direct Investment, Net Inflows (FDI):** 4,871 (BoP, current USD millions, 2014)
- **Gross Fixed Capital Formation (GFCF):** 25% of GDP (2014)
- **Human Development Index:** 0.870 (very high), rank 28

**Territorial Organisation and Subnational Government Responsibilities**

**Main Features of Territorial Organisation.** The Czech Republic has a two-tier subnational government system, with no hierarchical link. Regions were established in 2000 (Regions Act 129/2000). Municipalities are regulated through the Municipal Act 128/2000. The municipal level includes municipalities, towns (mesto) and 25 statutory cities (statutarni mesto). The latter have a special status granted by an Act of Parliament and can establish districts at the sub-municipal level with their own mayor, council and assembly - but only eight cities have chosen this option.

**Main Subnational Governments Responsibilities.** The Municipal and Region acts, both amended in 2002, make a distinction between autonomous and delegated responsibilities, i.e. exercised on behalf of the central government. While municipalities have equal status, they are divided into three categories according to the scope of their delegated responsibilities: 205 municipalities with “extended powers” (ORP), 1,036 municipalities with some delegated powers (e.g. registry office, building authority) including 183 municipalities with an authorised municipal authority and the remaining which are “basic” municipalities. Municipal competences include education (pre-elementary, primary, and lower secondary education), agriculture, housing, primary health care, social care services, local roads and public transport, water and waste management (ORP only). Some municipal competences are currently being re-allocated from small municipalities to larger ones and to the central government within the framework of the Social Reform. Regional responsibilities include upper secondary education, regional roads, public transport, health care/general hospitals, economic development and planning, social assistance for disadvantaged groups.

**Subnational Government Finance**

SNG spending is sizeable in key policy areas, being slightly below the OECD average for unitary countries (13% of GDP and 29% of public spending in 2013). The share of SNGs in public staff expenditure is significant. SNGs have a key role in public investment, however on average marginally lower than in unitary countries of the OECD (56% of public investment and 15% of SNG budget). Discretionary powers of SNGs are limited as much spending is made on behalf of the central government. Overall, municipalities have greater spending responsibilities than regions.
The largest category of spending by far is education, SNGs being responsible both for current and capital expenditure in this sector up to lower secondary school. The second most important area of spending is economic affairs, particularly transport. It is followed by general public services and environment, in particular, waste and waste water treatment. The share of social protection expenditure in SNG expenditure has decreased over recent years, since the recentralisation of some competences in this area (12% in 2010).

SNGs are subject to a balanced budget rule. Moreover, following the new Constitutional Act approved in October 2012, a new fiscal framework is under preparation regulating local government indebtedness. It requires that the level of SNG gross debt remains below 60% of a four year average of revenues. SNG debt is lower than the level of debt of other OECD unitary countries which amounted to an average of 15% of GDP and 12% of general government debt in 2013. Municipal debt is concentrated in the four largest cities (50% of municipal debt in 2013).

Grants and subsidies. In contrast to municipalities, regions rely mostly on transfers from the central government. The central government funding structure is highly complex. Transfers include hundreds of subsidy schemes, which are mostly earmarked. Grants typically come from either the national budget, or the budget of several state funds. Some transfers are fixed and relatively stable over time, in particular those aimed at funding delegated expenditure. Grants for current expenditure are formula-based and typically earmarked, in particular to fund delegated responsibilities (education, health, etc.). Other transfers for capital expenditure (around 20% of total transfers) are typically granted on a case-by-case basis. Municipalities can also apply for subsidies from the regions.

Other revenues. Other revenues include user tariffs and fees from municipal services in particular water and sewerage charges, municipal waste collection fee or library fees (15% of SNG revenues). Property income includes rents, interest income and sales of property charges, parking charges, planning application fees, etc. (24% of local revenue).

SNGs are subject to a balanced budget rule. Moreover, following the new Constitutional Act approved in October 2012, a new fiscal framework is under preparation regulating local government indebtedness. It requires that the level of SNG gross debt remains below 60% of a four year average of revenues. SNG debt is lower than the level of debt of other OECD unitary countries which amounted to an average of 15% of GDP and 12% of general government debt in 2013. Municipal debt is concentrated in the four largest cities (50% of municipal debt in 2013). Loans represented 56% of outstanding debt in 2013, bonds around 9% (bond issuance must be approved by the Ministry of Finance) and other accounts payable 35%.
